ATTENTION: Software Engineering students

- As of July 1, 2010, some changes will be made to the list of required CS courses in the BScSwE core curriculum.

- Students who are enrolled in the BScSwE program before July 2010, but who are graduating after July 2010, will have the choice of satisfying <u>the old core requirements</u> or <u>the new ones</u>.

- The changes to the core requirements are summarized below. Questions should be directed to the BScSwE coordinator.

Required CS/INFO courses in the BScSwE core curriculum	
Before July 2010	After July 2010
CS1003: Programming and Problem Solving	
CS1073: Introduction to Comp. Prog. I (in Java)	
CS1083: Introduction to Comp. Prog. II (in Java)	
CS1303: Discrete Structures	
CS2043: Software Engineering I	
CS2333: Computability and Formal Languages	
CS3043: Software Engineering II	
CS3413: Operating Systems I	
CS3503: Systems Analysis, Design and Proj. Mgmt.	
CS3613: Programming Languages	
INFO2103: Information System Fundamentals	
CS2023: Procedural Program Development	CS2253: Machine Level Programming
CS3323: Introduction to Data Structures	CS2383: Data Structures and Algorithms
CS3933: Algorithms	CS3383: Algorithm Design and Analysis
CS4865: Data Communications and Networking I (as a possible substitute for CMPE3812)	CS3873: Net-centric Computing (first offered WI 2011) (as a possible substitute for CMPE3812)

Note:

- CS2023 will be offered one more time in Intersession 2010.
- CS2253: First offerings will be in Winter 2011 and Intersession 2011.

- CS3933 will be offered one more time in Fall 2010.

- CS2383: First offerings will be in Fall 2010 and Winter 2011.
- CS3383: First offering will be in Winter 2011.
